

# Summer Innovation Institute - Basic Technology Camp

## A FREE camp for high school students!

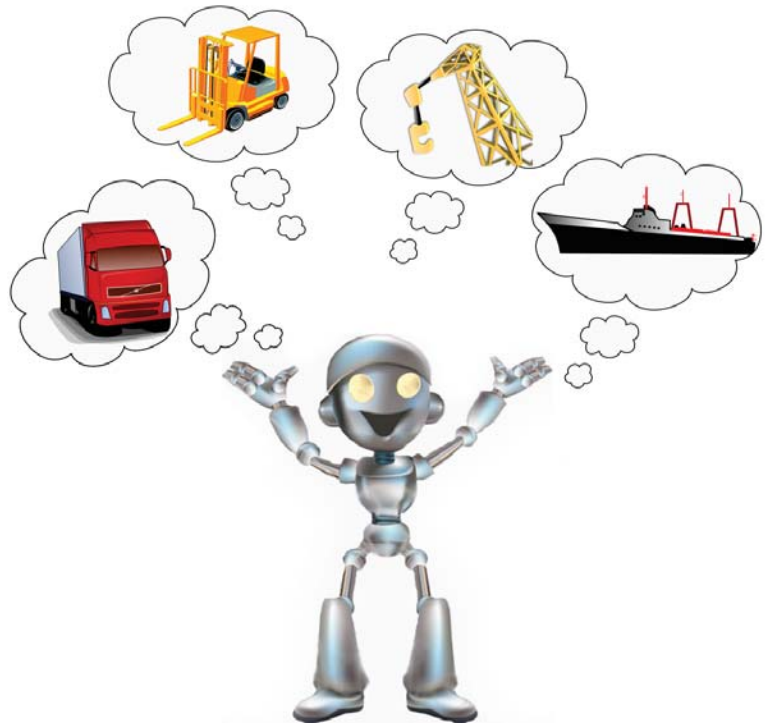

Presented by the

RCC Center for Applied Competitive Technologies (CACT)

Join us for our 4th Annual Summer Innovation Institute Technology Camp! Ever wonder how the items in a store get manufactured, moved, warehoused, inventoried, ordered, pulled from stock, shipped and distributed? This summer, we will be focusing on the technologies that make it happen! This camp will introduce high school students to electronics, manufacturing and logistics using math and science. Best of all, this camp is offered FREE of charge to high school students!

At this years Basic Technology Camp you will:

- Focus on the technologies that make our economy work!
- Learn how robotics and the automation process help get goods from one place to another.
- Build robots and other automated equipment.
- Learn about barcoding and RFID technologies.
- Expand your horizons for possible career and educational opportunities that will benefit you for the rest of your life!
- Have fun while getting hands on experience using robot kits and computers!
- And much more!

July 6-9 and 13-15, 2009
